DEAN'S MESSAGE,

Eng. Abdirahman Ismail Dhaqane
Dean, Faculty of Engineering

Faculty of Engineering

Welcome to the Faculty of Engineering at Mogadishu University. Choosing the right academic program in tertiary level is a crucial step for your career and your life. We offer you a very high-quality engineering degree and a unique opportunity to match engineering with the life you've always dreamed of achieving.

I would like to extend my heartfelt congratulations to the graduating students who are going to receive their degrees and diplomas at the end of their study.

In today's modern world, critical infrastructure is essential for society, ranging from safe transportation routes to clean water distribution. To meet our immediate and long-term needs, we must develop sustainable practices and innovative project management approaches. Henceforth, civil engineering focuses on public domain infrastructure, including transportation, water resources, buildings, and structures such as dams and bridges. Civil engineers design and oversee the construction of facilities such as high-rise buildings, airports, and sanitation plants, balancing the needs of society with technical and economic feasibility.

The Faculty of Engineering at Mogadishu University has three main departments: civil, architectural, and electrical and electronic engineering. All courses our departments are laid out to provide students with the necessary skills and knowledge to design and build structures, systems, and technologies that meet the needs of society. The main goal is to gradually prepare students to become innovative, technically proficient professionals in five years, and finally to and contribute to the development of sustainable and innovative solutions in their respective fields. In addition to that, students are given to practical courses that rely on laboratory work from the first semester up to the graduation.

In regard to acquiring the skills and knowledge necessary to become successful engineers, the faculty of engineering also provides internships for its final year students. Through these internships, students get the opportunity to apply their skills and theoretical knowledge in real life situations by being attached to various firms and organizations to work in practical fields. Having grown both academically and personally during your time here, I have no doubt that you will excel in your future endeavors.

In conclusion, I would like to extend my congratulations to all the graduating students of the faculty of Engineering for achieving their academic goals. As you step forward into the world, we expect you to be the beacons of education and development in our country, both today and in the future. I wish you all the very best of luck.
